

WELCOME

to the

East Corridor EIS Corridor-wide Meeting

Tonight we are presenting refinements to the East Corridor Preferred Alternative. RTD and Union Pacific (UP) Railroad have been engaged in negotiations for several UP properties for RTD's FasTracks system, including portions of the East Corridor Preferred Alternative. As part of RTD's system-wide FasTracks negotiations with the railroad, UP presented RTD with a package of properties in early 2008 that was more than the FasTracks budget could accommodate.

To keep the East Corridor EIS on pace for its scheduled 2015 opening, we will include in our upcoming draft an evaluation of refinements to the Preferred Alternative in the portions of the alignment where we would be on UP property between DUS and Quebec Street.

We have identified refinements to the East Corridor alignment that would work best with the fewest private property impacts. These refinements will be evaluated using the same criteria the project team has developed in conjunction with the communities and stakeholders.

The project team is here to give an update, answer questions, hear your thoughts and/or concerns regarding this information, and provide information on how future decisions will be made.

Presentation begins at 6:00 p.m.

The presentation will cover the following topics.

- ① Project Schedule
- ② Project Update
- ③ Next Steps

THANK YOU

for taking the time to get involved
